

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCIENCE

FRIDAY, JANUARY 5, 1917

Filable Announcements of New Books:

WILHELM SEGERBLOM 18

CONTENTS

The American Association for the Advancement of Science:—

The New York Convocation 1

Productive Scientific Scholarship: THEODORE ROOSEVELT 7

Dedication of the Ceramic Engineering Building of the University of Illinois 12

"Science" and the Cost of Paper 13

Scientific Notes and News 14

University and Educational News 18

Discussion and Correspondence:—

Phosphates: PROFESSOR C. A. MOOERS. Soil Solution: J. FRANKLIN MORGAN. Oligaerobe Histanaerobe: DR. M. W. LYON, JR.

Quotations:—

The Work of the American Association ... 20

Scientific Books:—

Lectures on Nutrition: DR. C. F. LANG-WORTHY. Catalogue of the Lepidoptera

Phalænæ: DR. HARRISON G. DYAR 21

Special Articles:—

The Rearing of Drosophila Ampelophila

Loew on Solid Media: J. P. BAUMBERGER

AND R. W. GLASER 21

New York Meeting of the American Association for the Advancement of Science: W. E.

HENDERSON 22

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-Hudson, N. Y.

THE NEW YORK CONVOCATION

THE meeting of the American Association for the Advancement of Science and the affiliated national scientific societies held in New York City during the last week of the year was the largest and most important gathering of scientific men hitherto held in this country or elsewhere. The association met in twelve sections and there were fifty-two separate societies in session, not counting the four great engineering societies, which held one general meeting with the association. It is difficult to estimate the attendance. The registration of members of the association was in the neighborhood of 2,100, but it is impossible to state the percentage of members of the association who register, or the percentage of those in attendance at the meeting who are members of the association. Casual observation seemed to indicate that about one in four or five attending the meetings wore the badge of the association and this would give an attendance of over 8,000, but naturally very little weight can be laid on such an estimate. In spite of the magnitude of the meeting, Columbia University and the other places in which sessions were held did not appear
